

Kevin Kumbuckal | Computer Science Graduate

CONTACT

kevin1231870@gmail.com

Curious and driven Computer Science graduate with a hands-on approach to problem-solving, passionate about technology, continuous learning, and building practical solutions to real-world problems.

PROJECTS

Lost V2 — Custom Android Launcher

Kotlin, XML, Android Studio

- Developed a lightweight custom Android launcher using Kotlin and XML, implementing a minimal interface designed for low-powered Android hardware.
- Built and tested the application on a physical Android device, debugging UI and performance issues throughout development.

E-Commerce REST API

Node.js, Express.js, PostgreSQL

- Developed a REST API using Node.js and Express with PostgreSQL for persistent data storage.
- Designed database tables and implemented backend routes for application data.

Raspberry Pi Web Server

Linux, SSH, Python, Networking

- Configured a Raspberry Pi Zero 2 W as a headless Linux server using SSH and hosted browser-based applications over the local network.
- Configured network connectivity and automatic server startup for remote access.

Jammming — Spotify Web Application

React, JavaScript, Spotify API

- Built a React web application integrating with the Spotify API to search for music and create custom playlists.
- Implemented OAuth authentication, API requests and application state management.

EDUCATION

De Montfort University — BSc Computer Science

SEPT 2020 - JUN 2025

South & City College Birmingham — Level 3 Extended Diploma in Electrical & Electronic Engineering

SEPT 2018 - JUN 2020

St Thomas Aquinas Catholic School, Birmingham — GCSEs

JUN 2018

SOFT SKILLS

Customer Service

Troubleshooting

Critical Thinking

Problem Solving

Communication

Quick Learner

Multi-Tasking

HARD SKILLS

Full-stack Development

Android Development

Git

GitHub

Google Firebase

HTML/CSS

kotlin

JavaScript

PHP

Node.js

Dart

React / React Native

RESTful APIs

SQL
