

Kevin Kumbuckal | Computer Science Graduate

CONTACT

kevin1231870@gmail.com

Curious and driven Computer Science graduate with a hands-on approach to problem-solving, passionate about technology, continuous learning, and building practical solutions to real-world problems.

PROJECTS

Lost V2 — Custom Android Launcher

Kotlin, XML, Android Studio

- Developed a lightweight custom Android launcher using Kotlin and XML, implementing a minimal interface designed for low-powered Android hardware.
- Built and tested the application on a physical Android device, debugging UI and performance issues throughout development.

E-Commerce REST API

Node.js, Express.js, PostgreSQL

- Developed a REST API using Node.js and Express with PostgreSQL for persistent data storage.
- Designed database tables and implemented backend routes for application data.

Raspberry Pi Web Server

Linux, SSH, Python, Networking

- Configured a Raspberry Pi Zero 2 W as a headless Linux server using SSH and hosted browser-based applications over the local network.
- Configured network connectivity and automatic server startup for remote access.

Jamming — Music Playlist Web Application

React, JavaScript, YouTube Data API

- Built a responsive React music application integrating the YouTube Data API for real-time music search and track discovery.
- Developed custom playlist functionality with track management, duplicate prevention and browser-based persistence using localStorage.
- Implemented REST API integration, asynchronous data handling, application state management and API error/loading states.

SOFT SKILLS

Customer Service

Troubleshooting

Critical Thinking

Problem Solving

Communication

Quick Learner

Multi-Tasking

HARD SKILLS

Full-stack Development

Android Development

Git

GitHub

Google Firebase

HTML/CSS

kotlin

JavaScript

PHP

Node.js

Dart

React / React Native

RESTful APIs

SQL

EDUCATION

De Montfort University — BSc Computer Science

SEPT 2020 - JUN 2025
